

PushApp

Helping people become who they choose to be.

Stop living by default. Start living by design.

Imagine. **Dare.** **Achieve.**

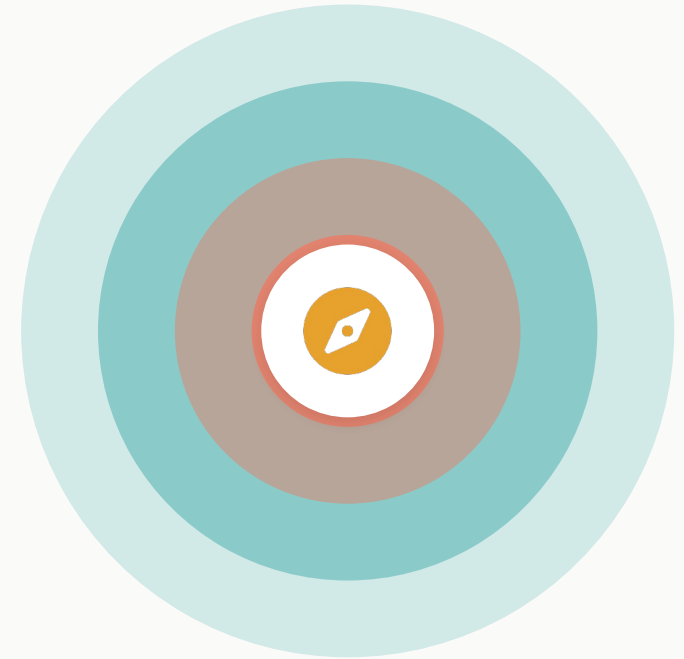

THE PROBLEM

Knowing what you want isn't the hard part.

People rarely fail from lack of ambition. **They fail because lasting change is hard to sustain — alone.**

The whirlpool

You lift your head, decide to change, start moving — and the current pulls you back. PushApp is the guide that helps people escape it.

The moment for a growth companion is here.

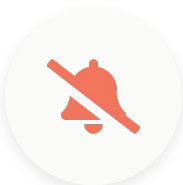

AI can finally be a companion

A persistent, personal guide between the reminders and conversations.

Rich real-life context

Phones carry time, calendar and location — the signals to intervene well.

Distraction is at an all-time high

People feel — and want to reverse — the cost of it.

Learning went short & continuous

Growth now happens in small sessions, not long courses.

OUR VISION

People are not a finished version of themselves.

Identity isn't fixed. Everyone can grow and intentionally shape who they become — PushApp exists to help them, and to keep them on the path.

The long-term vision

Become the operating system for personal growth — accessible and supported, not reserved for the already-disciplined.

THE SOLUTION

Not a habit tracker. A personal-growth platform.

Five things that usually live in separate apps — in one coherent experience that learns how each person succeeds.

Structured Journeys

goal → steps, rhythm & your “why”

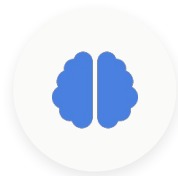

Buddy companion

an evolving creature that grows with you

Meaningful support

a chosen circle who cheer you on

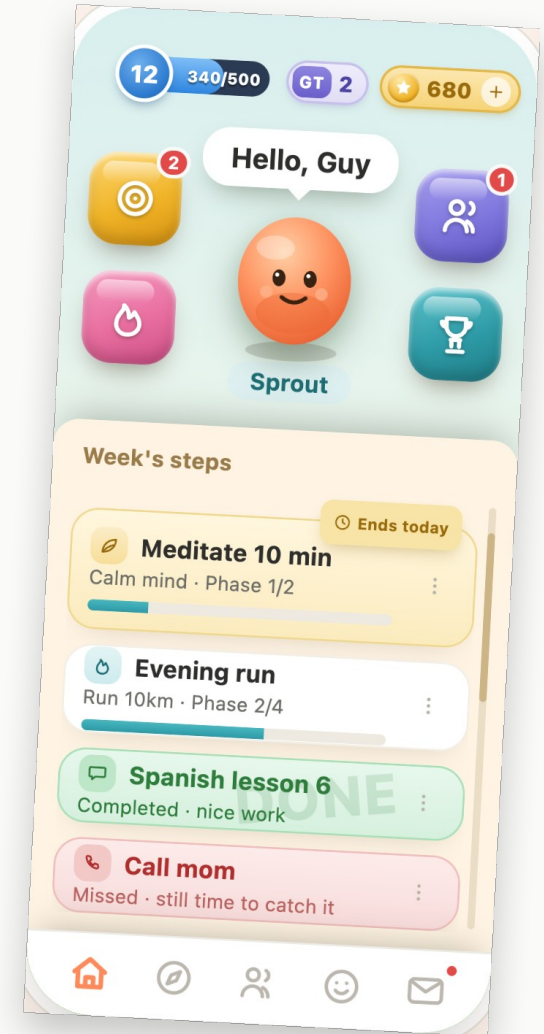

Intervention Engine

learns when — and when not — to nudge

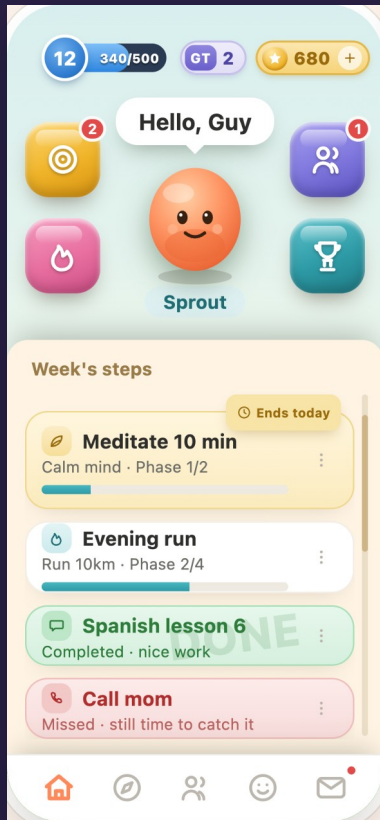

+ **Game-layer reinforcement** makes it enjoyable — never the point.

PushApp

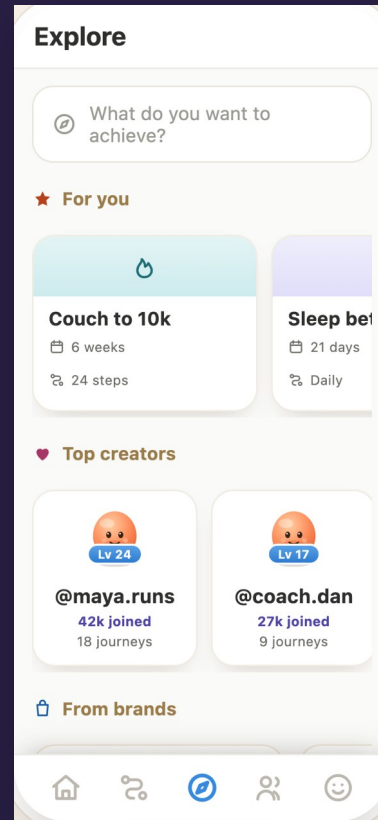

THE PRODUCT

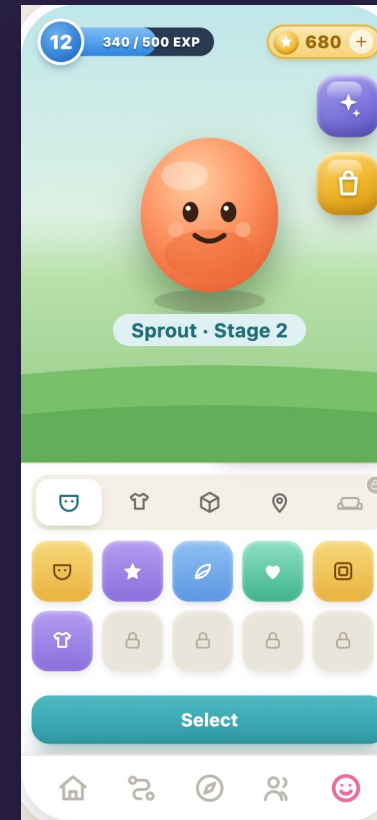

One place for the whole journey.

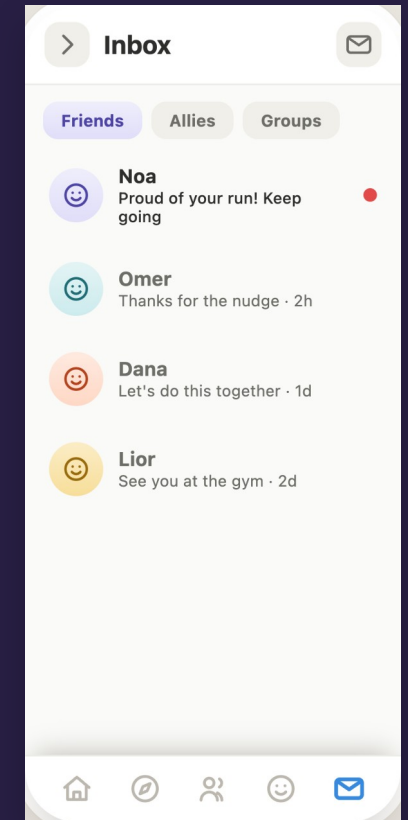

Home — what to do now

Explore — adopt a Journey

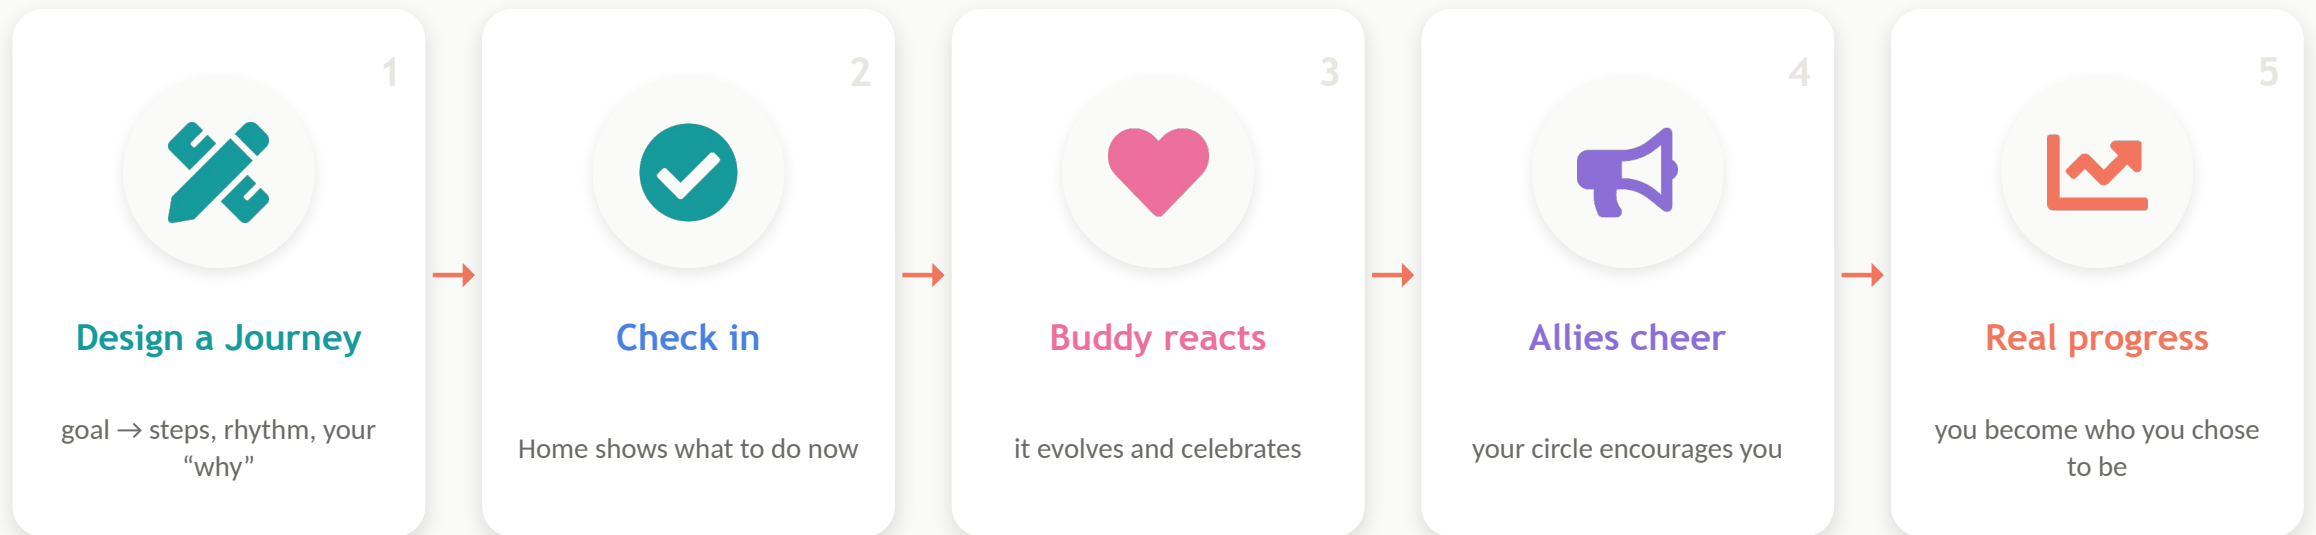

Buddy — grows with you

Support — friends who cheer

HOW IT WORKS

One loop that keeps people moving.

The loop compounds: every turn deepens the Buddy bond, the social ties, and the belief "I can keep going."

WHY IT STICKS

Meet Buddy.

Instead of “an AI assistant,” users build a relationship with a companion that hatches, grows and celebrates with them. Identity, attachment and consistency — in one character. Over time, Buddy becomes PushApp.

Gamification is reinforcement — never the reward. The real reward never changes: “I actually became the person I wanted to be.”

WHY WE WIN

We replace the whole workaround.

Today people improvise with

- ✗ Paper notes & calendars
- ✗ Habit trackers (“did you today?”)
- ✗ WhatsApp for accountability
- ✗ ChatGPT for advice & planning

Fragmented. Nothing owns your success.

PushApp is the one system

- ✓ **Journey-based growth** — sustained change, not checkboxes
- ✓ **Human support by design** — asking for help made easy
- ✓ **Real-life success metrics** — progress, not app-time
- ✓ **A future growth marketplace** — creators, coaches & brands

The system users trust to maximize their probability of success.

THE MOAT

Every completed Journey makes the next one more likely.

Our advantage isn't only AI — it's a proprietary understanding of what actually helps different people finish. Data others can't buy, only earn.

- ✓ What motivates each kind of person
- ✓ Which timing and nudges work
- ✓ Which Journey structures succeed
- ✓ Which Ally relationships drive outcomes

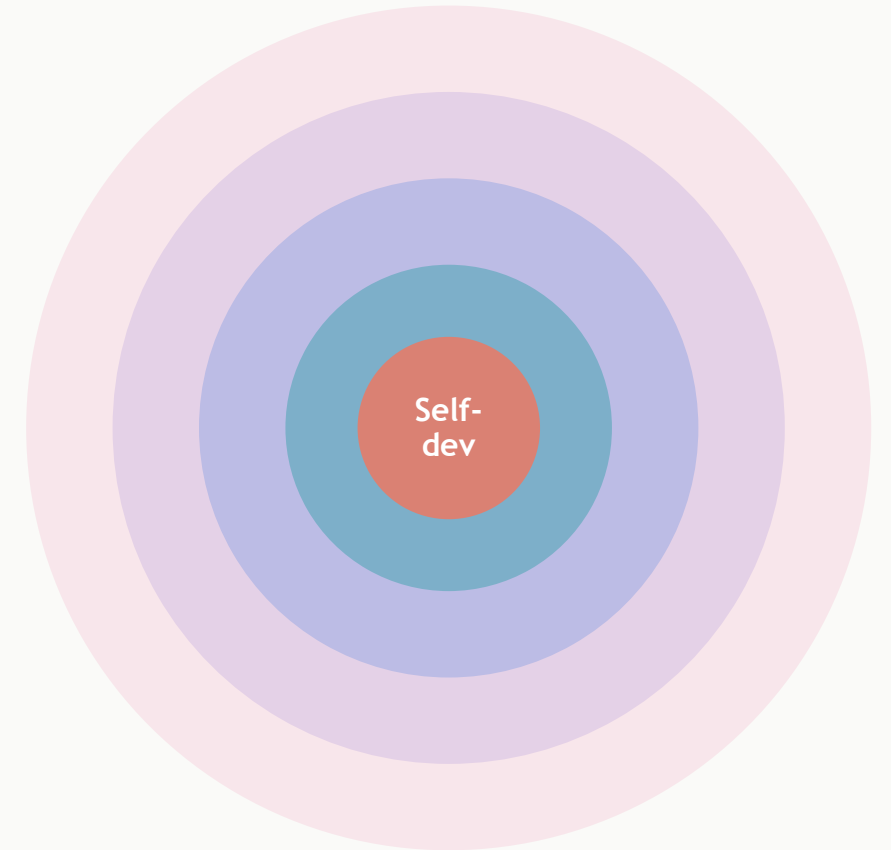

MARKET

Start focused. Expand into a multi-vertical growth platform.

Beachhead: young adults building habits & goals — reached via short-form social, with sharing as the viral loop.

-  **Consumer self-development** The wedge
-  **Coaching** Clients between sessions
-  **Corporate wellbeing** Teams & benefits
-  **Education** Learners & institutions
-  **Health adherence** Programs & outcomes

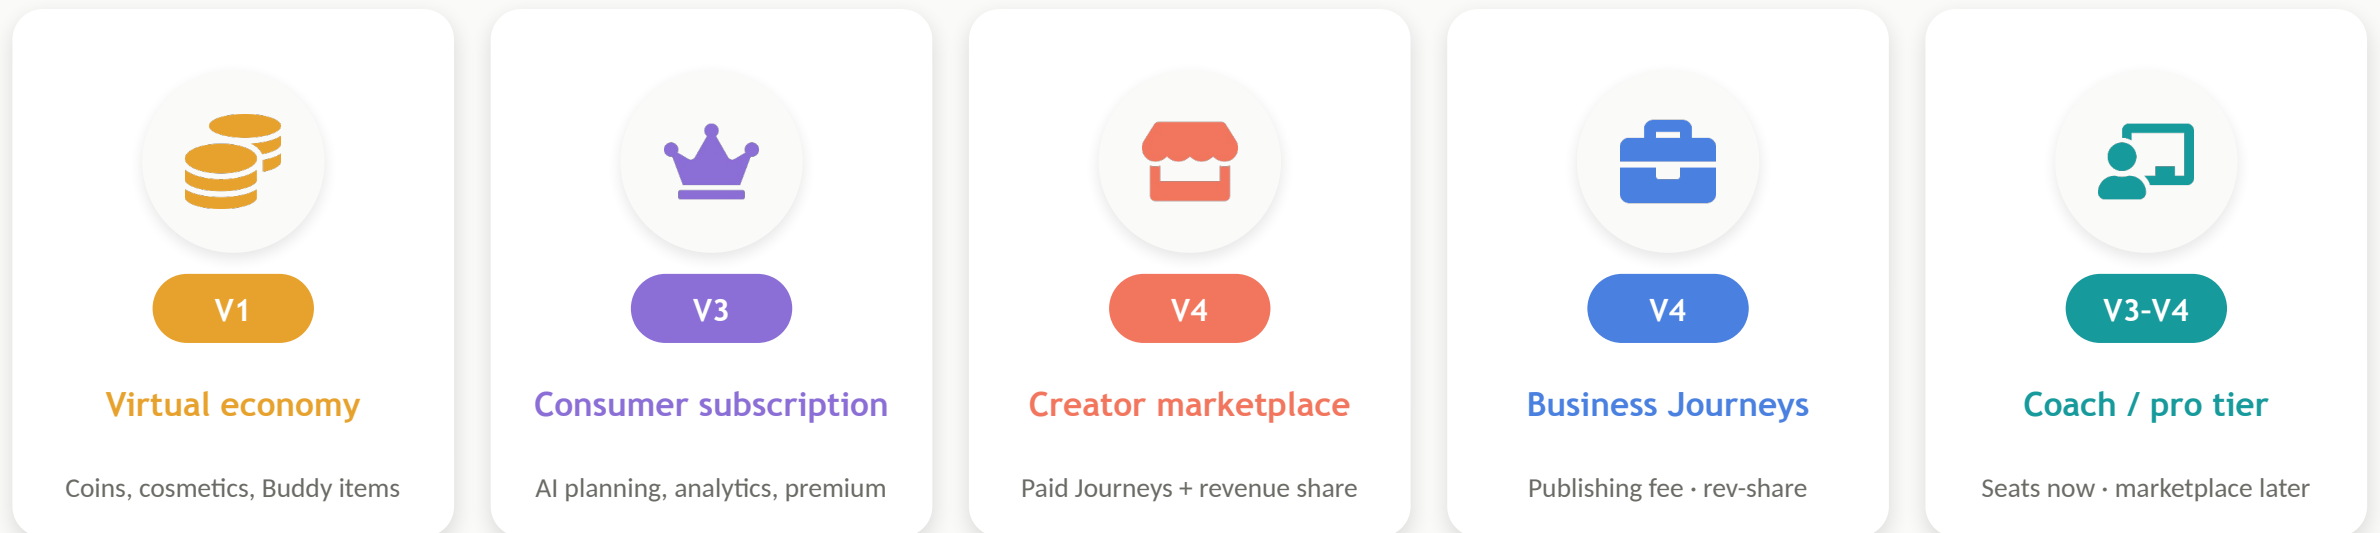

TAM / SAM / SOM sizing is an explicit next work item — flagged, not hand-waved.

BUSINESS MODEL

A portfolio of streams – not a single bet.

Core growth is always free. Monetization reinforces progress and turns on across the roadmap.

Early revenue leans on IAP + subscription. The creator & business marketplaces are the later scaling engine.

Four versions, one escalating proof.

V1 · POC

Does social + Buddy drive persistence?

Thinnest build: Journey loop, evolving Buddy, Allies, coins, reminders.

prove behavior change

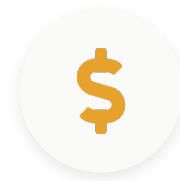

V2 · MVP

Adopt solo, keep for months

Explore library, onboarding (egg→hatch), full Journey types, light AI, Grace Tokens.

prove behavior change

V3 ·
Commercial

The first paid version

Adaptive Engine, weekly planning, AI drafting, Achievements, subscription.

prove we can charge

V4 · Scale

The platform & vision

Creator & business marketplaces, Rich Step Types, Buddy voice, full JITAI.

prove platform + moat

Growth built into the product.

Launch through short-form social, with sharing and friend invitations as the primary viral loop — then expand through creators and coaches who bring their own audiences.

Short-form social Instagram & TikTok creators

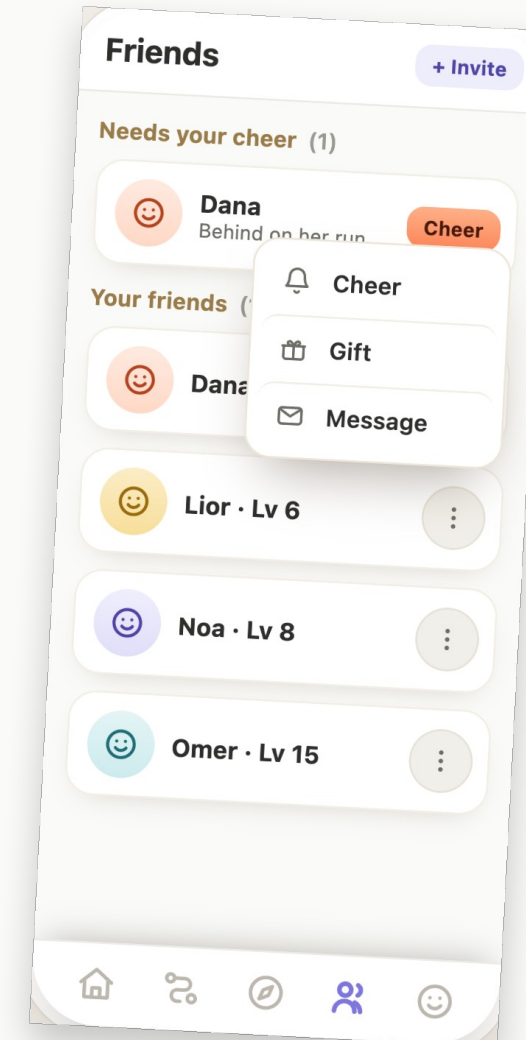

Viral Journey sharing progress is inherently shareable

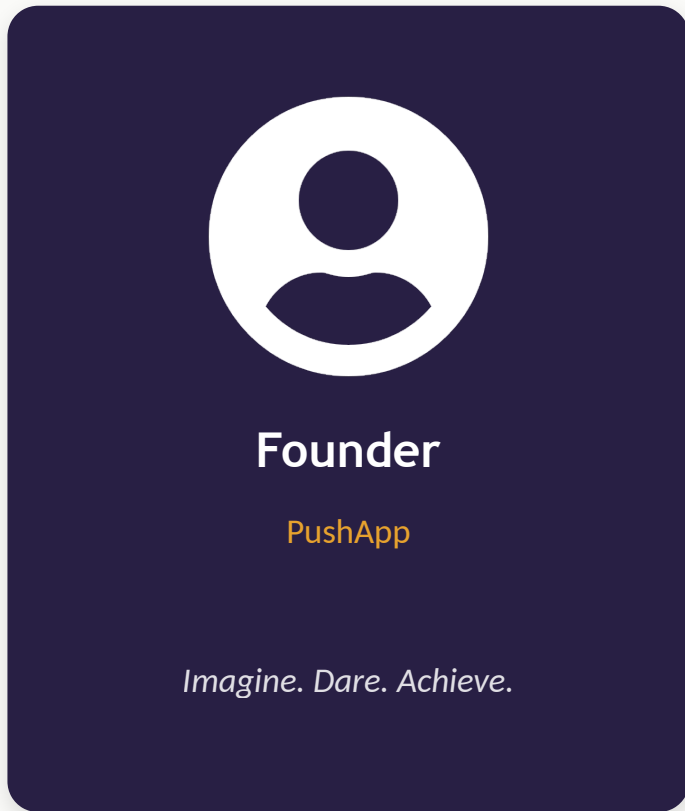

Friend invitations the Support Circle is the loop

Creators & coaches bring existing audiences

Built by someone who lived the problem.

The story isn't "one big success."

It's the opposite — he repeatedly felt how hard it is to stay on the path: knowing what he wanted, sometimes starting, then feeling life pull him back.

Success always needed support.

When change stuck, it took structure, accountability and encouragement. Millions live exactly this struggle.

PushApp is the system he never had.

A companion, a circle and a structure that raise anyone's probability of becoming who they choose to be.

“

THE MAGIC MOMENT

“I didn't think I could stay consistent... but I actually did.”

That first moment of self-belief is the product. Everything we build exists to make it happen more often, for more people.

Imagine. **Dare.** **Achieve.**

PushApp • Helping people become who they choose to be.
